An Irish sailor visited a city, where, of the houses with sheet lead.

In the nectar of my wave. And the violet and the lilly. Peeping from the wavy grass, With their modest eyelets shyly Nod me welcome as I pass.

Peeping vines and climbing roses Twine triumphal arches o'er My wild path, and swaying osiers Sigh sweet greetings from the shore. Tall trees bend to do me homage.

Holding o'er me feathery boughs, And the shadows of their foilings Lightly on my bosom glows. Now I catch them, and reflect them On my glancing wavelets bright,

Trembling down, to gem my breast; And I sing each tiny gleamlet With a lullaby to rest.

And I fold them and I held them In a fond and sweet embrace, Till the coming beams of morning From my arms the treasures chase.

Then I kiss them and release them With a murmur and a sigh, And upon the breezes send them To their azure homes on high. Thus, 'mid scenes of beauty flowing, Dancing, glancing, on I sweep,

With a boundless spirit going To my home, my native deep.

A SPLENDID OFFER! READ IT

The Courier will be greatly improved during the ensuing year. It will furnish all the local news, notices of meetings, assessments, tax and other sales, markets, etc., etc., giving information that every resident of this county ought to have, and cannot deprive himself of, without being likely to lose many times the cost of the paper. The Village, Farm, Town and County Talk on subjects of local interest, will be supplied fully in our columns, besides much interesting reading. All this can be had at scarcely 4 cents a week, or nly \$2 for the entire year!

And Better Still. Almost everybody knows the high value of the American Agriculturist a journal that has just completed its 37th successful year. It is a large, beautiful journal, full of plain, practical, reliable, most useful information, for every man, woman and child. It prints every year 700 to 800 original engravings of labor-saving, labor-helping contrivances, many of them home-made; also of animals, plants, construction of buildings, etc., etc. The American Agriculturist also constantly publishes exposures of the various humbugs and swindlers that prey upon the people with their artful schemes. These expesures save tens of thousands of dollars to its readers every year.
With all its splendid features, and an

outlay of over \$25,000 a year in collecting and preparing information, engravings, etc., the circulation is so large that it is supplied to subscribers, post-paid, for only \$1.50 each year.

We are happy to announce that we have made arrangements to furnish to cash subscribers, BOTH the COURIER and the American Agriculturist, for the small sum of only \$2.65 a year, both post-paid, which is but a trifle over five cents a week. Who will not smoke one cigar less a week, or save five cents from some other needless expenditure, if necessary, to constantly supply himself and family with both of these journals? Remember, only \$2.65 pays for the Courier and the American Agriculturist, both sent post paid for a whole year. Please tell your neighbors of this

As to the question, What has befallen him? there are many surmises, some of which are, that he accidentally shot him elf and is either dead or lying in the woods in a helpless condition; others say he must have become bewildered, lost his way and in the night stepped into one of the quick sand holes, frequent in that swamp, and been swallowed up. One of the gentlemen who has been on the search says he came across the rail of a large bear and thinks perhaps Ross fell a victim to him. Others suggest that he was bitten by a snake and died of the poison ere he could reach a bouse.

HICKMAN : : KENTUCKY. SEWER

THE NEW WILSON Oscillating Shuttle SEWING MACHINE is wonderful in its conception, unprece-

dented for doing a large range of sewing in textile fabrics and leather. Its mo-

tions are continuous, admitting of an extraordinary rate of speed, either by steam or foot power. Every motion of the treadle makes six stitches, thus producing about one-third more work in a day than other Sewing Machines. It has no stop motions, and tightens the stitch with the needle out of the fabric. It uses the wellinown Wilson Compound Feed on both sides of the needle. It has

two-thirds less parts than any other first-class Sewing Machine. Its arm is fully eight and one-half inches long and five and one-half inches high, and the whole Machine is very compactly and scientifitally constructed in proportions, elegance, design and appearance. Its simple, powerful and perfect mechanism places it as far in advance of all other Sewing Machines as the telephone is superior to the tin speaking tube. The WILSON MENDING ATTACHMENT, for repairing all kinds of textile fabrics WITHOUT PATCHING, furnished FREE with all WILSON SEWING MACHINES. Prices furnished with freight charges prepaid, and machines furnished on trial to responsible parties, to be used with steam-power, in places where we have no agents. Send for Illustrated Catalogue and Price List, No. 230.
